Moshiur Rahman Deap
MERN Stack Developer

Mymensingh, Bangladesh | +8801409063324 | **LinkedIn** | **Github**

Career Objective

Driven and curious web developer aiming to join a tech-driven team where I can build cool, user-centric stuff, level up my skills, and solve real-world problems through code. Looking to grow in a fast-paced environment where innovation, collaboration, and clean code matter.

Skills

- ⊙ **Frontend**: ■ HTML5 ■ CSS3 ■ Bootstrap ■ Tailwind CSS ■ JavaScript(ES6+) ■ React.JS ■ Responsive Design
- ⊙ **Backend**: ■ Express.js ■ MongoDB(CRUD) ■ Node.js ■ REST API ■ JSON Web Token ■ Dotenv
- ⊙ **Tools & Tech**: ■ VS Code ■ GitHub ■ Figma ■ Photoshop ■ Netlify ■ Firebase
- ⊙ **Soft Skills**: ■ Fluent Communication Skills ■ Eloquent Speaker

Experience

1. ### Projukty Sheba | 2025 – Present
   As a **MERN Stack Developer at Projukty Sheba**, I build scalable full-stack web apps using **MongoDB, Express.js, React, and Node.js**. My work includes developing responsive UIs with **Tailwind CSS**, securing apps with **JWT/Firebase Auth**, and integrating **Stripe** for payments. I design clean REST APIs, manage state efficiently in React, and contribute to admin dashboards and community platforms. With a strong focus on performance, code quality, and UX, I collaborate in agile workflows using **GitHub** and modern dev practices.

Projects

CodeCircle - [Dev Forum Platform**]**   **Live Site** | **Client Code** | **Server Code**

- **Founded & built CodeCircle**, a full-stack dev community platform using **MERN Stack**, with secure auth (Firebase + JWT) and role-based access.
- Developed a dynamic **forum system** with comment moderation, reporting, and real-time feedback tracking.
- Integrated **Stripe payments** for membership tiers, with custom dashboards and analytics for users & admins.

Coursion - [an online course enrollment platform**]**   **Live Site** | **Client Code** | **Server Code**

- Integrated JWT and Firebase for secure email/password and Google authentication.
- Built course enrollment logic with seat limits and max 3 active course restriction.
- Designed responsive admin dashboard with full course CRUD and role-based access.

Miverr - [a freelance service marketplace for Bangladeshi users**]**   **Live Site | Client Code | Server Code**

- Developed a service marketplace with dynamic gig posting, filtering, and user-based gig management.
- Integrated secure authentication, user profiles, and real-time messaging between buyers and sellers.
- Designed responsive UI with Tailwind & React, ensuring smooth UX for both freelancers and clients.

Technology: React.js, Tailwind CSS, React Router, Node.js, Express.js, MongoDB, Firebase Auth, JWT, Axios

Certification

- Complete Web Development With Programming Hero

Education

Bachelor of Arts(B.A) at National University
